

Living on the edge

Wetlands and birds in a changing Sahel

Leo Zwarts Rob G. Bijlsma Jan van der Kamp Eddy Wymenga

What do Siberian-breeding ruffs, Dutch purple herons and Spanish subalpine warblers have in common? They all winter in Africa's Sahel! *Living on the edge* is a tribute to the region's function as an important wintering area for long-distance migrants. This fascinating book describes the challenges the birds have to cope with – climate change, of course, and rapid man-made habitat changes related to deforestation, irrigation and reclamation of wetlands. How have all these changes affected the birds, and have birds adapted to these changes? Can we explain the changing numbers of breeding birds in Europe by changes in the Sahel, or vice versa? This book will answer more questions than you will be able to raise.

“Brilliant! This book is incredibly comprehensive, beautiful and rich.”

Prof. Theunis Piersma, international acclaimed biologist

- a thoughtful synthesis of unpublished information, combined with vivid descriptions of landscapes and animals
- richly illustrated with large numbers of drawings, maps and photographs by acclaimed experts
- a fascinating read for conservation professionals and nature enthusiasts with an interest in Africa, wetlands, migrating birds, and the ever changing global biosphere
