[Julia Stahl](#) ^[1]

Titel(s):

Dr.

afdeling:

Onderzoek & Inventarisaties

functie:

Afdelingshoofd Onderzoek

vestiging:

Nijmegen

e-mail:

julia.stahl@sovon.nl ^[2]

telefoon:

024 7 410 476

06 49 39 05 13

Onderzoeksveld:

long-term research experience on

- coastal and wetland ecology, especially ecology and population biology of arctic geese and ducks, meadow birds and birds of prey
- functional ecology of bird migration and habitat connectivity
- effects of global change such as climatic change and changes in human land use on the interplay between soil, plants and birds.

Expertise:

- experimental field and laboratory studies on behavioural ecology, nutritional ecology and ecophysiology of waterbirds
- satellite telemetry and comparative studies with geolocation light level loggers on migratory pathways and timing of migration
- advanced experience in statistical habitat modelling

Editorial Board Member:

- Ardea (Journal of the Netherlands Ornithologist Union) 2004 to 2010
- Journal of Ornithology from 2012

CV:

Scientific Experience

- *10/2012 until present*
Head of Research and Consultancy at Sovon
- *11/2008 - 09/2012*
Senior Researcher and Lecturer at Landscape Ecology Group, Univ. of Oldenburg, Germany
- *11/2004 - 10/2008*
Post-Doc at Landscape Ecology Group (prof. M. Kleyer), Univ. of Oldenburg; leader of junior research group "Flexible migration patterns in arctic geese" (DFG Deutsche Forschungsgemeinschaft)
- *11/2002 - 10/2004*
Post-doc at Community and Conservation Ecology (prof. H. Olf, prof. J.P. Bakker) and Animal Ecology (prof. R.H. Drent, prof. T. Piersma), Rijksuniversiteit Groningen
- *09/2001 - 10/2002*
Ecologist at It Fryske Gea - research on salt-marsh restoration projects in relation to habitat use of waterfowl

Scientific education

- *1990 - 1995*

MSc Study of Biology at University of Cologne, Germany, University of Vienna, Austria and University of Groningen, The Netherlands

- *1996-2001*

PhD at Centre for Ecological and Evolutionary Studies CEES, Rijksuniversiteit Groningen, Animal Ecology Group, Prof. Dr. R.H. Drent

Title of the PhD thesis 'Limits to the co-occurrence of avian herbivores. How geese share scarce resources.' based on field ecological studies on bird migration and the role of herbivores in coastal ecosystems; including behavioral and ecophysiological studies on arctic geese and large herbivores (sheep, cattle, hares) in the Wadden Sea and on Spitsbergen
